Sustainability Services

Your means to achieve robust
sustainability goals.

From small food and agriculture operations to large industry leaders, Pinion develops measurable and actionable sustainability programs that are scaled to satisfy your unique needs.

As a company specialized in food and agriculture advisory from policy to plate, we are immersed in creating solutions for the challenges posed by your industry and supply chain.

Our sustainability team expertly designs strategies to meet the needs of stakeholders and achieve robust sustainability goals – ultimately improving upon the social and environmental performance of businesses.

Experience the Pinion difference:

- Expert guidance for responsible improvements
- Deep food and ag expertise in production systems, especially at the farm level
- Creative strategies and implementation based on data and KPI intelligence
- Technical expertise with the latest protocols, frameworks, standards & metrics
- Multi-faceted expertise for a more vigorous level of assessment and assurance
- Leveraged insight from the firm's experts: conservation and agronomic teams, sustainability reporting and certified verification (LCFS) experts, accredited TSC service providers, trained greenhouse gas accountants, scientists, communicators, CPAs, and audit specialists

"Pinion has been a change agent for our industry in assisting in the development of an assurance quality program, that will contribute to the next evolution of consumer demands and buyer preferences for the pecan industry, while showcasing the industry's food quality, security, and sustainability practices."

-Alexander J. Ott, Executive Director, American Pecan Council
