

# YEARS OF INNOVATION DRIVEN BY YOU

Why did Intralox recently inspect more than 1,000 conveyors in your food processing plants? **BECAUSE WE HEARD YOU.**

The tough, belt-related challenges you repeatedly face demand reliably inventive solutions.

So, we sent our experts all over the world to survey your conveyors and see the problems firsthand.

Then, Intralox did what food manufacturers have relied on us to do for more than 50 years. **WE WENT TO WORK.**

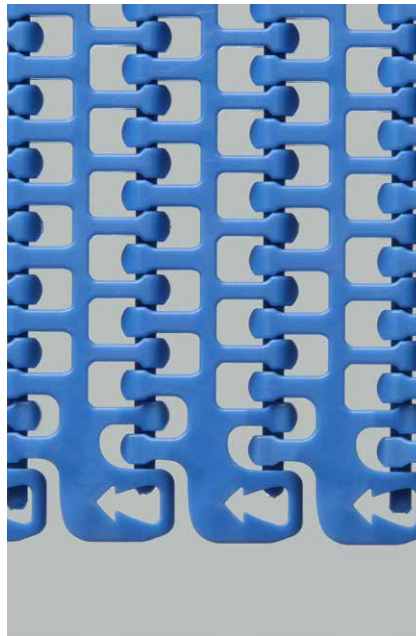

# UPGRADE TO THE BEST-IN-CLASS BELTING AVAILABLE FOR THE FOOD INDUSTRY

Intralox® FoodSafe™ Heavy-Duty Edge (HDE) belting is the only solution of its kind available to food manufacturers. The heavy-duty belt edge was designed and developed to reduce foreign material risk and minimize unscheduled downtime for your toughest conveyance challenges.

**S800 HEAVY-DUTY EDGE IN PK**

**S2400 RADIUS WITH HEAVY-DUTY EDGE IN PK**

**INTRALOX® CLEAN RELEASE**

When combined with Polyketone (PK) material, Intralox HDE belting is the strongest, safest, most fault-tolerant modular plastic belting ever developed for food manufacturers.

Our industry specialists and new product engineers took on your conveyance challenges as our own.

The result? **Years of innovation, driven by you.**
